

**Handheld GPS Mapping Made Easier by MobileMapper 6.....  
Buy affordable GPS for GIS solution now...  
Get Sub-Meter Accuracy with SBAS..**

**Key Features**

- Extremely rugged and waterproof to IPX7 standards
- Integrated, low-power, high-sensitivity antenna for clear reception and longer battery life
- Windows Mobile 6 operating system
- SiRFstarIII™ delivers fast GPS position acquisition
- Integrated 2 megapixel digital camera to capture pictures of the collected GPS features
- 2 AA Size batteries for easy replacement in the field operated up to 10 hours
- Bluetooth technology for wireless communication
- SD Card Memory Slot for unlimited data storage

**Package with**

- GPS Receiver
- USB Data Cable
- 2 AA NiMH and Battery Charger
- Spare Stylus (5)
- Getting Started Guide
- External GPS Antenna
- AC Power Adapter

**Pre – Installed with ESRI Arcpad 7.0 for Field Data Collection**

- ArcPad® is the world's leading software package for mobile geographic information system (GIS) and field mapping applications.
- It provides field-based personnel with the ability to capture, analyze, and display geographic information in near real time.
- Field data collection with ArcPad is efficient and accurate and can integrated input from GPS receivers, rangefinders, and digital cameras.

1. Take data into the field

2. Display and query your data

3. Edit and create data

4. Check the edit Back into ArcGIS

**Storage, Edit, View and Print your Own Map Using ESRI ArcGIS 9.3 Desktop Software (Optional)**

- ArcGIS® is the world's leading software package for geographic information system (GIS)
- It provides platform to store, edit attribute data, update data, manipulate data, analysis data, map projection and map printing.
- Project management using GIS made easier by linking geo location with attributing data, pictures, tables and analysis output.
